Document Version

2.0.0 (June 2026)

All pages across the NyayNow platform, structured by functional area.

PUBLIC PAGES

/ Home Landing page, hero sections, Bento grids	/about About Us Mission, team biography, company story
/contact Contact Contact forms with backend mail integrations	/pricing Pricing Subscription options and tier matrices
/blog Blog Platform and legal news updates	/career Careers Job listing and application boards
/professionals For Professionals Premium features showcase for lawyers	/case-studies Case Studies In-depth platform impact stories
/methodology Methodology Core AI algorithms and logic explanations	/security-and-compliance Security & Compliance Compliance metrics (DPDP, GDPR)

AI-POWERED TOOLS

[/assistant](#)

NyaySathi AI

Primary AI legal chatbot interface

[/judge-ai](#)

Judge AI

Predictive outcome analytics engine

[/judge-pro](#)

Judge Pro

Advanced argument analyses for practitioners

[/research](#)

Legal Research

AI-powered search for case law and acts

[/drafting](#)

Document Drafting

AI contract generator templates

[/analyze](#)

Document Analyzer

PDF parser and summary engine

[/nyayvoice](#)

NyayVoice

Multilingual speech-to-text AI interface

[/voice-assistant](#)

Voice Assistant

Browser audio controls and interactions

[/courtroom-battle](#)

Courtroom Battle

Simulated legal dispute interface

[/moot-court](#)

Moot Court

Interactive oral argument trainer

[/nyaycourt-simulator](#)

NyayCourt Simulator

Full procedural simulation platform

[/devils-advocate](#)

Devil's Advocate

AI counter-argument mock processor

LAWYER & MARKETPLACE

[/marketplace](#)

Marketplace

Lawyer search listings powered by Algolia

[/lawyer/:id](#)

Lawyer Profile

Individual profile pages, ratings, bio

[/legal-sos](#)

Legal SOS

Emergency distress dispatch panels

[/nearby](#)

Nearby Services

GIS mapping of courts, police, and lawyers

[/ecourts](#)

eCourts

Web scraping interface for Indian court status

[/meet](#)

Video Meet

Embedded Jitsi consultation client

[/video-call](#)

Video Call

Peer-to-peer webRTC client launcher

[/agreements](#)

Agreements

E-signature document manager portal

[/rent-agreement](#)

Rent Agreement

Wizard builder for tenancy contracts

DASHBOARDS (AUTHENTICATED)

/client

Client Dashboard

Case timelines, invoice list, message queue

/messages

Messages

Socket.io real-time chat interface

/calendar

Calendar

Court dates schedule and appointments

/analytics

Analytics

Platform usage graphs (Recharts)

/settings

Settings

Profile, payment setup, passwords

/payment

Payment

Razorpay portal interfaces

/compliances

Compliances

DPDP dashboard metrics

Key dependencies, frameworks, libraries, and integrations.

FRONTEND STACK

TECHNOLOGY	VERSION	PURPOSE / CONTEXT
Next.js	14.1.0	React production framework, hybrid SSR/SSG rendering
Tailwind CSS	3.4.3	Utility styling framework across all pages
Framer Motion	12.33.0	Interactive state transitions and client-side page animations
Lenis	1.3.17	Smooth scrolling integration for browsers
Algolia InstantSearch	7.23.2	Faceted client search interface for lawyer matchmaking
Recharts	2.12.2	Dashboard graphics and metrics representation
Socket.io Client	4.7.5	Client WebSockets for messaging and location tracking
jsPDF	4.2.0	Client-side compilation and formatting of legal PDFs
React Leaflet	4.2.1	Mapping visualization client for local lawyer locators

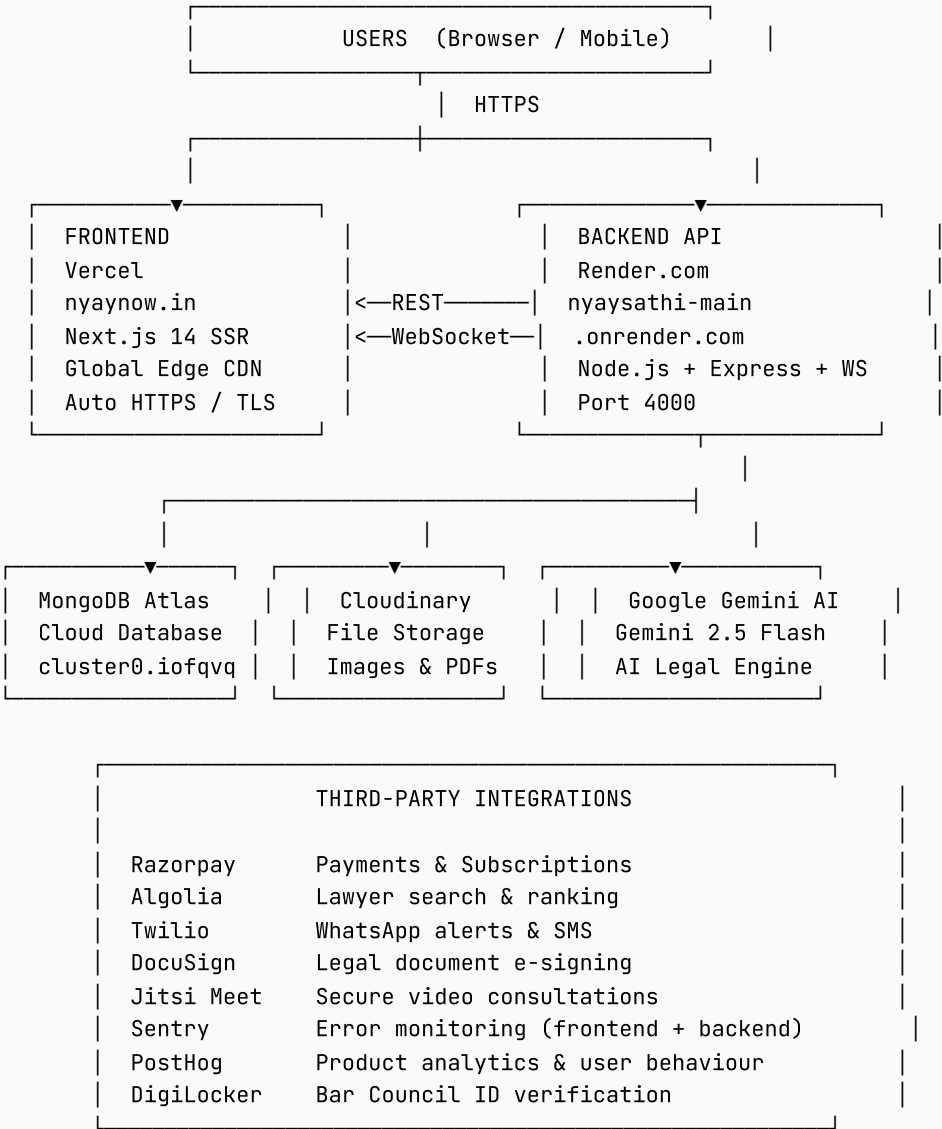

BACKEND & DATABASE

TECHNOLOGY	VERSION	PURPOSE / CONTEXT
Node.js	>=18.0.0	JavaScript runtime environment
Express.js	4.18.2	HTTP REST endpoint builder and middleware manager
Socket.io	4.8.3	Real-time WebSocket broker server
Mongoose	7.8.8	Object Document Mapper (ODM) for MongoDB
MongoDB Atlas	Cloud	Primary server storage engine (NoSQL)
Razorpay SDK	2.9.6	Subscription generation and transaction validation
Twilio SDK	5.12.1	Sms notifications and Whatsapp dispatch logic
Helmet.js	8.1.0	Secure HTTP response headers management

ARTIFICIAL INTELLIGENCE

SERVICE	PROVIDER	FUNCTION
Gemini 2.5 Flash	Google AI Studio	Generative text API for assistant and analysis
Gemini Vision	Google AI Studio	OCR verification engine for Bar Council documentation
Indian Kanoon API	Indian Kanoon	Grounding engine for statutory references and case histories

Host configurations, pipelines, and external integrations in production.

SERVICE URL INVENTORY

SERVICE NAME	HOSTING PROVIDER	PRODUCTION URL / URI
Frontend	Vercel Edge Network	`https://nyaynow.in`
Backend API	Render.com Services	`https://nyaysathi-main.onrender.com`
Database Cluster	MongoDB Atlas Cloud	`cluster0.iofqvq2.mongodb.net`
Media / PDF Storage	Cloudinary	`res.cloudinary.com`
Payments Portal	Razorpay API	`checkout.razorpay.com`
Source Code Repository	GitHub	`github.com/dhruvkumar2107/NyayNow`

Host route list targeting the production gateway base URL.

ENDPOINT PATH	METHODS	FUNCTIONAL DESCRIPTION
/healthz	GET	Performs server uptime and DB socket connection verification
/api/auth	POST	Registers new client/lawyer user roles, processes Google OAuth tokens
/api/ai	POST	Gemini interface controller (chatbots, predicting outcome, moot simulator)
/api/lawyers	GET POST PUT	Retrieves listing collections, modifies verified details, updates rankings
/api/users	GET PUT DEL	Access control profiles endpoints
/api/messages	GET POST	Returns conversation history streams
/api/chats	GET POST	Stores user session chats with Gemini models
/api/appointments	GET POST PUT	Scheduler, video room associations, updates status
/api/payments	POST	Generates Razorpay request hashes, validates webhooks
/api/subscriptions	GET POST DEL	Manages lawyer recurring packages
/api/leads	GET POST	Lead credits accounting and client matches
/api/cases	GET POST PUT	Manages case documentation metadata and file links
/api/agreements	GET POST	AI agreement generation, signing integrations
/api/crm	GET POST PUT	Customer Relationship Management client database tool for lawyers
/api/ecourts	GET	Aggregates case registry databases based on case numbers
/api/verification	GET POST	DigiLocker credential assertion webhooks
/api/whatsapp	POST	Receives and decodes Twilio webhook events

Active collections instantiated in MongoDB Atlas.

User	Case	Appointment	Message
ChatHistory	Connection	Agreement	Invoice
Payment	Notification	Post	Topic
Event	CRMClient	CasePrediction	AuditLog
Confession			

Technical mitigation measures protecting operations.

JWT Authentication

Stateless authorization signatures (jsonwebtoken version 9.0.3). Extracted and validated on every middleware request.

Password Encryption

Salting and hashing via bcryptjs. Raw strings are scrubbed before arriving at storage or logs.

Helmet.js Protection

Configures HTTP headers preventing clickjacking, enforcing content security policies, and upgrading connections to HTTPS.

Rate Limiting

Standard Express middleware limiting general endpoints to 300 requests per 15 minutes, auth to 10 per hour.

DPDP Compliance

Aligns storage lifetimes and cookie usage patterns to the guidelines of the Indian DPDP Act 2023.

WebSocket Guard

Enforces identical JWT assertions during the initial HTTP handshake of any WebSocket client request.

Git repository release tag milestones.

v1.0.0-initial

Initial Release

commit 95b3c4a - Base routing structures, MongoDB integrations, client/lawyer UI frames

v1.1.0-auth

OAuth Integrations

commit fd71597 - Google One Tap verification modules, role setting database upgrades

v1.2.0-features

Core AI Services

commit 617d253 - Judge AI predictors, document scanner models, video room bindings

v1.3.0-monetization

Billing & Locales

commit 020b87e - Razorpay gateways, regional AI assistants, automated calendar syncing

v1.4.0-startup-upgrades

Security Overhaul

commit 0015dd4 - Rate limit controls, logging scrubbing filters, input length verification

v2.0.0-professionals

Professionals Suite

commit 6846b87 - Premium legal marketing modules, UX upgrades, chatbot enhancements

Key environment variables necessary for system build and run states.

FRONTEND (.ENV)

VARIABLE NAME	DESCRIPTION
NEXT_PUBLIC_API_URL	Base address pointing to Render backend API gateway
NEXT_PUBLIC_GOOGLE_CLIENT_ID	Google One Tap credential verification ID key

BACKEND (.ENV)

VARIABLE NAME	DESCRIPTION
MONGO_URI	Atlas connection string including user, cluster domain, and db collection names
JWT_SECRET	Secure private token key used during registration / handshake cycles
GEMINI_API_KEY	Google Generative AI access key token credentials
RZP_KEY_ID / RZP_KEY_SECRET	Razorpay production merchant billing credentials
CLOUDINARY_CLOUD_NAME / KEY / SECRET	API endpoints to upload file data profiles
SENTRY_DSN	Logging error reporting service address endpoints
TWILIO_ACCOUNT_SID / AUTH_TOKEN	SMS notification authentication credentials
